

Chiastische Relationen bei semiotischen Klassen und Situationsklassen

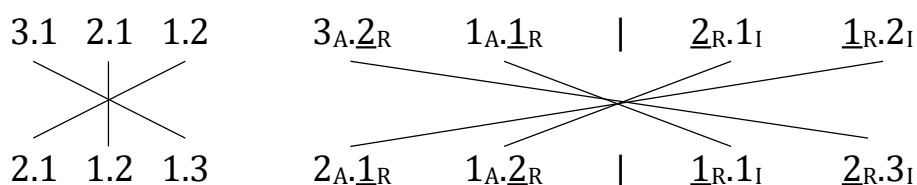

1. Proömiatität und tetradische Chiasmen sind die beiden wesentlichen Grundstrukturen polykontexturaler Systeme (vgl. Kaehr 2007, S. 26). Der Übergang von den triadisch-trichotomischen Zeichenrelationen zu den tetradischen, d.h. aus zwei Paaren von Dyaden bestehenden Situationsklassen (vgl. Toth 2025) ermöglicht es deshalb, chiastische Relationen auch innerhalb der ansonsten monokontexturalen Semiotik aufzuzeigen.

2. Im folgenden werden die chiastischen Relationen für semiotische Klassen und für Situationsklassen für das vollständige ternäre semiotische 27er-System aufgezeigt. Man beachte, daß alle Pfeile in den Dualsystemen *duale* Abbildungen sind.
