

2. Die romanische Mundart von Sils i.D. und die angrenzenden Ortsmundarten um 1900

2.1. Vorbemerkung

Das Ausgangsmaterial für die vorliegende Untersuchung stammt aus dem Phonetischen Normalbuch von Luzi (1903-05). Zunächst werden die beiden Ortsdialekte von Sils (Nr. 34) und Scharans (Nr. 33) miteinander verglichen (Kap. 2.2). Hernach werden beide zusammen je einer benachbarten Ortsmundart der angrenzenden Talschaften gegenübergestellt (Kap. 2.3 bis Kap. 2.7). Gewählt wurden für das äußere Domleschg Rodels (Nr. 32), für das Schams Zillis (Nr. 42), für das Albulatal Obervaz¹ (Nr. 58), für den oberen Heinzenberg der heute ausgestorbene Dialekt von Flerden (Nr. 39), und für den unteren Heinzenberg der heute ebenfalls erloschene Dialekt von Cazis (Nr. 36).

Mit Hilfe von jeweils drei Ortsmundarten ergeben sich die folgenden fünf Kombinationsmöglichkeiten. In dem nachstehenden Schema stehe die Variable x für die Nrn. 32, 42, 58, 39 und 36. Konstant sind jeweils Nr. 34 (Sils) und Nr. 33 (Scharans). „-“, steht für Übereinstimmung, „/“ für Nichtübereinstimmung:

1. x-34-33: x = 34 = 33
2. x-34//33: (x = 34) ≠ 33
3. x-33//34: (x = 33) ≠ 34
4. x//34-33: x ≠ (34 = 33)
5. x//34//33: x ≠ 34 ≠ 33

mit $x \in \{\text{Rodels, Zillis, Obervaz, Flerden, Cazis}\}$.

¹ „Das Domleschg hatte Kontakt zum Obervazer Romanisch, das zum Unterhalbsteinischen gehört. Die Kontakte erfolgten über den alten Schynweg, über das Maiensäß Creusen/Crusen und über die Alp Raschil“ (Ebnetter/Toth 1998, S. 31).

Um es auch noch „impressionistisch“ auszudrücken: Der Kombinationstyp 1 besagt, daß alle drei Ortsmundarten bezüglich eines Reflexes (phonetisch und morphologisch sowie natürlich semantisch) übereinstimmen. Bei Typ 2 stimmt die pro Kapitel mit Sils sowie Scharans verglichene Mundart mit Sils, nicht aber mit Scharans überein, und bei Typ 3 besteht die Übereinstimmung nur mit Scharans, nicht jedoch mit Sils. Beim Typ 4 stimmt ein für Sils und Scharans identischer Reflex nicht mit dem entsprechenden Reflex einer Ortsmundart überein. Beim Typ 5 schließlich haben wir den Fall, daß alle drei jeweils verglichenen Ortsmundarten paarweise abweichende Reflexe haben.
