

Trajektische Multisets

1. In der vierfachen Darstellung semiotischer Relationen (über der vollständigen ternären Semiotik), die in Toth (2025a) vorgelegt wurde, finden sich zahlreiche Fälle von Multisets¹, und zwar nicht nur bei den Trajekten, sondern auch bereits bei den Komplementationen. Im folgenden werden die Schnittmengen für ZKL und $\mathfrak{T}(\text{ZKL})$ einerseits und CKL und $\mathfrak{T}(\text{CKL})$ getrennt behandelt, obwohl es weitere nicht leere Schnittmengen zwischen $\mathfrak{T}(\text{ZKL})$ einerseits sowie CKL und $\mathfrak{T}(\text{CKL})$ andererseits gibt.

2. Semiotische Quadrupelrelationen als Multisets

1.

$$\text{ZKL} = (3.1, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, \textcolor{red}{1.1}, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\text{CKL} = (\textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (\textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3}, \textcolor{blue}{2.3})$$

$$\text{CKL} \subset \mathfrak{T}(\text{CKL}).$$

2.

$$\text{ZKL} = (3.1, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.1, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\text{CKL} = (1.1, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 1.2, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3}, \textcolor{blue}{2.3})$$

3.

$$\text{ZKL} = (3.1, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.1, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\text{CKL} = (1.1, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 1.2, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2}, \textcolor{blue}{3.3}, \textcolor{blue}{2.3})$$

4.

$$\text{ZKL} = (3.1, 2.2, 1.1)$$

¹ Zu Multisets in polykontexturalen Systemen vgl. Kaehr (2012).

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.2, 2.1, 2.1)$$

$$\text{CKL} = (1.2, 2.1, 2.3, 3.2, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 2.1, 2.2, 1.3, 2.3, 3.2, 3.3, 2.3)$$

$$\text{ZKL} \cap \mathfrak{T}(\text{ZKL}) = \emptyset. \mathfrak{T}(\text{CKL})\text{-„Sandwich“ (so auch passim).}$$

5.

$$\text{ZKL} = (3.1, 2.2, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.2, 2.1, 2.2)$$

$$\text{CKL} = (1.1, 2.3, 3.2, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 1.3, 2.3, 3.2, 3.3, 2.3)$$

6.

$$\text{ZKL} = (3.1, 2.2, 1.3)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.2, 2.1, 2.3)$$

$$\text{CKL} = (1.1, 1.2, 2.1, 2.3, 3.2, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 1.2, 1.2, 2.1, 2.2, 1.3, 2.3, 3.2, 3.3, 2.3)$$

7.

$$\text{ZKL} = (3.1, 2.3, 1.1)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.3, 2.1, 3.1)$$

$$\text{CKL} = (1.2, 2.1, 2.2, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 2.1, 2.2, 1.2, 2.3, 2.3)$$

8.

$$\text{ZKL} = (3.1, 2.3, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 1.3, 2.1, 3.2)$$

$$\text{CKL} = (1.1, 2.2, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 1.2, 2.3, 2.3)$$

Multisets mit $\text{ZKL} \cap \mathfrak{T}(\text{ZKL}) = \emptyset$ und $\text{CKL} \cap \mathfrak{T}(\text{CKL}) = \emptyset$.

9.

$$\text{ZKL} = (3.1, 2.3, \textcolor{red}{1.3})$$

$$\mathfrak{I}(\text{ZKL}) = (3.2, \textcolor{red}{1.3}, 2.1, 3.3)$$

$$\text{CKL} = (\textcolor{blue}{1.1}, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, \textcolor{blue}{2.2}, 3.3)$$

$$\mathfrak{I}(\text{CKL}) = (\textcolor{blue}{1.1}, \textcolor{blue}{1.2}, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, \textcolor{blue}{2.2}, \textcolor{blue}{1.2}, 2.3, 2.3)$$

10.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\mathfrak{I}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\text{CKL} = (\textcolor{blue}{1.3}, 2.2, 3.1, \textcolor{blue}{3.3})$$

$$\mathfrak{I}(\text{CKL}) = (1.2, 3.2, 2.3, 2.1, \textcolor{blue}{3.3}, \textcolor{blue}{1.3})$$

11.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\mathfrak{I}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\text{CKL} = (\textcolor{blue}{1.1}, \textcolor{blue}{1.3}, 2.2, 3.1, \textcolor{blue}{3.3})$$

$$\mathfrak{I}(\text{CKL}) = (\textcolor{blue}{1.1}, \textcolor{blue}{1.3}, 1.2, 3.2, 2.3, 2.1, \textcolor{blue}{3.3}, \textcolor{blue}{1.3})$$

12.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\mathfrak{I}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.1}, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\text{CKL} = (1.1, 2.2, 3.3)$$

$$\mathfrak{I}(\text{CKL}) = (1.2, 1.2, 2.3, 2.3)$$

$$\text{CKL} \cap \mathfrak{I}(\text{CKL}) = \emptyset$$

13.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 1.1)$$

$$\mathfrak{I}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 2.1, 2.1)$$

$$\text{CKL} = (\textcolor{blue}{1.2}, \textcolor{blue}{1.3}, 2.1, \textcolor{blue}{3.1}, \textcolor{blue}{3.3})$$

$$\mathfrak{I}(\text{CKL}) = (1.1, 2.3, \textcolor{blue}{1.2}, \textcolor{blue}{3.1}, 2.3, 1.1, \textcolor{blue}{3.3}, \textcolor{blue}{1.3})$$

14.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 2.1, \textcolor{red}{2.2})$$

$$\text{CKL} = (1.1, \textcolor{blue}{1.3}, \textcolor{blue}{3.1}, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (1.1, \textcolor{blue}{1.3}, \textcolor{blue}{1.3}, \textcolor{blue}{3.1}, \textcolor{blue}{3.3}, \textcolor{blue}{1.3})$$

$$\text{CKL} \subset \mathfrak{T}(\text{CKL}).$$

15.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 1.3)$$

$$\mathfrak{T}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.2}, 2.1, 2.3)$$

$$\text{CKL} = (1.1, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, \textcolor{blue}{1.2}, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, 2.3, 1.3)$$

16.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 1.1)$$

$$\mathfrak{T}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 2.1, 3.1)$$

$$\text{CKL} = (\textcolor{blue}{1.2}, \textcolor{blue}{1.3}, \textcolor{blue}{2.1}, \textcolor{blue}{2.2}, \textcolor{blue}{3.1}, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 2.3, \textcolor{blue}{1.2}, \textcolor{blue}{3.1}, \textcolor{blue}{2.2}, \textcolor{blue}{1.2}, 2.3, \textcolor{blue}{2.1}, \textcolor{blue}{3.3}, \textcolor{blue}{1.3})$$

$$\text{CKL} \subset \mathfrak{T}(\text{CKL}).$$

17.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 2.1, \textcolor{red}{3.2})$$

$$\text{CKL} = (1.1, \textcolor{blue}{1.3}, 2.2, 3.1, \textcolor{blue}{3.3})$$

$$\mathfrak{T}(\text{CKL}) = (1.1, \textcolor{blue}{1.3}, 1.2, 3.2, 2.3, 2.1, \textcolor{blue}{3.3}, 1.3)$$

18.

$$\text{ZKL} = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 1.3)$$

$$\mathfrak{T}(\text{ZKL}) = (\textcolor{red}{3.2}, \textcolor{red}{2.3}, 2.1, 3.3)$$

$$\text{CKL} = (1.1, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, \textcolor{blue}{2.2}, 3.3)$$

$$\mathfrak{T}(\text{CKL}) = (\textcolor{blue}{1.1}, \textcolor{blue}{1.2}, \textcolor{blue}{1.2}, \textcolor{blue}{2.1}, \textcolor{blue}{2.2}, \textcolor{blue}{1.2}, 2.3, 2.3)$$

19.

$$\text{ZKL} = (3.3, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.1, \textcolor{red}{2.1}, \textcolor{red}{1.1})$$

$$\text{CKL} = (1.3, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, \textcolor{blue}{3.2})$$

$$\mathfrak{T}(\text{CKL}) = (1.2, \textcolor{blue}{3.2}, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, 3.3, 1.2)$$

Konverses $\mathfrak{T}(\text{CKL})$ -„Sandwich“ (vgl. Nr. 4).

20.

$$\text{ZKL} = (3.3, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.1, \textcolor{red}{2.1}, \textcolor{red}{1.2})$$

$$\text{CKL} = (\textcolor{blue}{1.1}, \textcolor{blue}{1.3}, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, \textcolor{blue}{3.2})$$

$$\mathfrak{T}(\text{CKL}) = (\textcolor{blue}{1.1}, \textcolor{blue}{1.3}, 1.2, \textcolor{blue}{3.2}, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, 3.3, 1.2)$$

$\text{CKL} \subset \mathfrak{T}(\text{CKL})$ „Sandwich“-Teilmengenschaft (d.h. CKL ist nicht „am Stück“, sondern distribuiert vollständig in $\mathfrak{T}(\text{CKL})$ enthalten).

21.

$$\text{ZKL} = (3.3, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.1, \textcolor{red}{2.1}, \textcolor{red}{1.3})$$

$$\text{CKL} = (1.1, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2})$$

$$\mathfrak{T}(\text{CKL}) = (1.2, 1.2, \textcolor{blue}{2.2}, \textcolor{blue}{2.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.2})$$

22.

$$\text{ZKL} = (3.3, 2.2, 1.1)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.2, 2.1, 2.1)$$

$$\text{CKL} = (\textcolor{blue}{1.2}, \textcolor{blue}{1.3}, 2.1, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, 3.2)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, \textcolor{blue}{2.3}, \textcolor{blue}{1.2}, \textcolor{blue}{3.1}, 2.2, \textcolor{blue}{1.3}, \textcolor{blue}{2.3}, \textcolor{blue}{3.1}, 3.3, \textcolor{blue}{1.2})$$

$\text{ZKL} \cap \mathfrak{T}(\text{ZKL}) = \emptyset$. Sowohl CKL als auch dessen Teilmengenschaft in $\mathfrak{T}(\text{CKL})$ sind Sandwiches.

23.

$$\text{ZKL} = (3.3, \textcolor{red}{2.2}, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.2, 2.1, \textcolor{red}{2.2})$$

$$\text{CKL} = (1.1, 1.3, 2.3, 3.1, 3.2)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 1.3, 1.2, 3.3, 2.3, 3.1, 3.3, 1.2)$$

Bei $\text{ZKL} \cap \mathfrak{T}(\text{ZKL}) = (2.2)$ liegt Teilmengenschaft mit gleichem Zeichenwert und verschiedenen ontischen Orten vor (so auch passim), vgl. Toth (2025b).

24.

$$\text{ZKL} = (3.3, 2.2, 1.3)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.2, 2.1, 2.3)$$

$$\text{CKL} = (1.1, 1.2, 2.1, 2.3, 3.2)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 1.2, 1.2, 2.1, 2.2, 1.3, 2.3, 3.2)$$

$$\text{ZKL} \cap \mathfrak{T}(\text{ZKL}) = \emptyset.$$

25.

$$\text{ZKL} = (3.3, 2.3, 1.1)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.3, 2.1, 3.1)$$

$$\text{CKL} = (1.2, 1.3, 2.1, 2.2, 3.1)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 2.3, 1.2, 3.1, 2.2, 1.2, 2.3, 2.1)$$

26.

$$\text{ZKL} = (3.3, 2.3, 1.2)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.3, 2.1, 3.2)$$

$$\text{CKL} = (1.1, 1.3, 2.2, 3.1)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 1.3, 1.2, 3.2, 2.3, 2.1)$$

27.

$$\text{ZKL} = (3.3, 2.3, 1.3)$$

$$\mathfrak{T}(\text{ZKL}) = (3.2, 3.3, 2.1, 3.3)$$

$$\text{CKL} = (1.1, 1.2, 2.1, 2.2)$$

$$\mathfrak{T}(\text{CKL}) = (1.1, 1.2, 1.2, 2.1, 2.2, 1.2)$$

$$\text{CKL} \subset \mathfrak{T}(\text{CKL}).$$
